

# WW90II GAS POWERED FRAMING NAILER

The new WW90II gas powered nailer is a perfect cordless alternative to the most popular solutions used when fixing in structural timber. It delivers comfort and safety, but also increases efficiency at work.

## FEATURES AND BENEFITS

Tool's engine energy output increased to 104 J to enable driving the longest 90mm ring shank nails into the hardest substrates

Lithium-Ion battery providing twice the performance - 8000 fixings per charge and charging time of 30 minutes

NEW ergonomically designed grip position for improved balance and working comfort

NEW design with improved durability and improved airflow efficiency through the redesigned air filter zone

Convenient, reliable and accurate fixing thanks to keyless nailing depth adjustment for improved precision and ease of use

Nose protection cap, that protects wood surface from getting damaged and minimises potential material waste

Convenient rafter hook, allowing you to hang up the nailer for a work break or whilst carrying

## BASE MATERIALS

### Certified for fixing in

Structural timber

Particleboard

Plywood

Wood

OSB

WW90 2<sup>nd</sup> generation gas powered framing nailer is an excellent cordless alternative for fixing in wooden structures, that require no power cables or compressed air hoses. It ensures mobility, safety and top performance. You can now handle a single fixing point in less than 1 second. With a battery pack whose capacity lasts for 8,000 fixings and the charging time of 30 minutes. You you receive a full package of outstanding benefits in terms of performance and repeated use.

## APPLICATIONS

Battens and counter battens

Roof boarding

Framework house structures

Façades and soffits

Formwork fixing

Terraces and arbours

## OPERATING INSTRUCTIONS

1. Press the tool against the fixture and base material.
2. Wait a fraction of a second for the gas to be mixed with air.
3. Press the trigger to perform a fixing.
4. Remove your finger from the trigger and retract the tool from the fixing point until there is no contact between the nose and the fixture.
